THE CSIR AT WORK TO DE-RISK AND SCALE CIRCULAR INTERVENTIONS

The circular economy is not about waste management or recycling; it is about sustainable resource management. It focuses on national resource security to support socioeconomic development through sustainable resource utilisation. The circular economy is centred on three principles: designing out waste and pollution, keeping products and materials in use and regenerating natural systems. Learn how the CSIR supports businesses in de-risking and scaling circular interventions.

BUILDING SKILLS FOR THE FUTURE

The CSIR is committed to fostering a skilled and knowledgeable state for a prosperous future. Our human capital strategy focuses on strengthening and building a strong pipeline in science, engineering and technology through ongoing initiatives such as bursary, internship and graduate-in-training programmes and studentships. These efforts attract and expose young people to careers in science, which is crucial for building a robust National System of Innovation in South Africa. Explore the various careers available at the CSIR.
