

CAREER OPPORTUNITY

The Council for Scientific and Industrial Research (CSIR) is a leading scientific and technology research organisation, implementing projects throughout Africa and making a difference in people's lives.

Masters Studentship

About the Job:

The CSIR has a vacancy for a **Masters Studentship** in the Nanocatalysis research group within the DST/CSIR National Centre for Nano-structured Materials of the Materials Science and Manufacturing (MSM) unit. The research work will focus on designing novel nanostructured metal/metal oxide composite heterogeneous catalysts, structural characterisation and catalytic activity testing in developing downstream chemical conversion processes of biomass platform chemicals. The position is based in Pretoria.

About the Unit:

The Centre undertakes innovative research on nanostructured materials and has an extensive research network with other local and international research organizations. It is well equipped with cutting-edge nanostructured materials synthesis, processing, characterization and testing facilities. In addition, there are nanostructures scale-up and industrial-scale polymer processing and product development facilities. It has a strong focus on human capital development, makes a significant contribution to the creation and dissemination of new scientific knowledge, and collaborates closely with industry to help ensure successful outcomes and impact of the group's research and development activities.

Key responsibilities:

- Prepare a research plan and proposal for the postgraduate study;
- Conduct research on project that is in line with the MSc dissertation and scope of the research group goals;
- Contribute to applicable multidisciplinary research projects, typically as part of a team;
- Write technical reports and oral presentation of results;
- Contribute towards co-authoring research outputs in peer-reviewed journals, or conference proceedings.
- Report research findings in the form of conference/symposium presentations and journal articles within timelines agreed with supervisor(s);
- Complete MSc dissertation and defend the work successfully;

- Contribute to extra activities that may be outside the scope of the MSc research as per the needs of the research group from time to time.

Qualifications, skills and experience:

- A BSc Honours degree in Chemistry, Applied Chemistry or Material Sciences with background in inorganic chemistry and metal nanoparticles synthesis is strongly recommended;
- Ability set-up chemical reaction processes, prior experience in working with reactor set-up, GC-FID or HPLC analysis is an added advantage, including the interpretation of raw data produced.
- Basic understanding of the field of heterogeneous catalysis, organic chemical synthesis is preferable
- Knowledge in characterisation techniques such as XRD, BET, SEM and TEM is desirable.
- Effective communication skills (oral, written and presentation);
- Ability to work independently, as well as working in a team;
- Be able to work under pressure and tight deadlines.

Should you meet the above requirements, please email your CV to jobapplications@csir.co.za with your name and surname, position title and reference number in the subject line, **(e.g. John Smith: Job title: Reference No: 308046)**

Closing date: 02 June 2017

PLEASE NOTE THAT FEEDBACK WILL BE GIVEN TO SHORTLISTED CANDIDATES ONLY.
