### Scope of Services for the provision of chemical analytical services to the CSIR on an as and when required basis for a period of five years

RFP No.: 9481/13/12/2024

#### 1. INVITATION FOR PROPOSAL

Proposals are hereby invited for the provision of chemical analytical services to the CSIR on an as and when required basis for a period of five years.

The purpose of the Request for Proposal (RFP) is to obtain capability, pricing and general information on the business of potential Contractors for the CSIR to determine the Contractors most capable of providing the service.

This RFP document details and incorporates, as far as possible, the tasks and responsibilities of the potential bidder required by the CSIR.

This RFP does not constitute an offer to do business with the CSIR, but merely serves as an invitation to bidder(s) to facilitate a requirements-based decision process.

Responses to this Request for Proposal (RFP) (hereinafter referred to as a Bid or a Proposal) are requested from suitably qualified entities (hereinafter referred to as a Respondent or Bidder) for the provision of chemical analytical services to the CSIR on an as and when required basis for a period of five years.

#### 2. PROPOSAL REQUIREMENTS

All proposals are to be submitted in a format specified in this enquiry. However, bidders are welcome to submit additional / alternative proposals over and above the originally specified format.

##### 2.1. Technical Proposal

The following must be submitted as part of the **technical** proposal:

- a. Company profile

- b. Detailed Technical Proposal
- c. Laboratory accreditation certificate/s
- d. Sample import permit(s) (if required)

## 2.2. Financial Proposal:

The following must be submitted as part of the **financial** proposal:

- Completed Pricing Schedule in Excel spreadsheet (**Annexure D**).
- CSD registration report (RSA suppliers only).

## 3. PROPOSAL SPECIFICATION

### 3.1. Scope of Work

#### Background

- The Coastal Systems and Earth Observation research group of the CSIR has projects that require the analysis of chemicals in a variety of matrices that include water, sediment, biological tissue (principally fish and shellfish tissue). The samples are almost exclusively from estuarine and marine environments.
- The CSIR has the capability to analyse many of the chemicals called for in this Request for Proposal, but in the event of instrument failure or servicing requirements, the assistance of an external service provider might be required in the short-term.
- The CSIR does not have the capability at present to analyse for several of the chemicals called for in this Request for Proposal, or not at the required Limit/s of Reporting. In these cases, an external service provider is required for the analyses.
- The quantity and scope of analytical services cannot be guaranteed and will be needed on an 'as and when required basis'.
- There is thus no guarantee that any analyses will be required from a successful bidder.
- The CSIR will be responsible for transporting samples to successful bidder laboratory/ies.
- Biological tissue and sediment samples will be provided in a freeze dried and ball milled state.

#### Laboratory accreditation:

- Respondent laboratories must be accredited for the services tendered, but not necessarily for each chemical within a chemical class (see below). Proof of accreditation must be provided.

#### Chemicals that require analysis:

- The chemicals and chemical classes that may require analysis are provided in Annexure D. Chemical classes are defined as chemicals that are traditionally analysed as a suite (e.g. organochlorine pesticides). Respondents can include one or more chemicals or chemical classes in their response. In other words, respondents are not required to submit a response for each chemical or chemical class.
- Respondents must provide Limit/s of Reporting as part of the submission. Please note that the

samples are almost exclusively from estuarine and marine environments. Respondents should thus provide Limit/s of Reporting for saline samples if these differ from Limit/s of Reporting for freshwater samples.

- In most cases, targeted Limit/s of Reporting are provided. Preference will be given to respondents that can achieve the Limit/s of Reporting. Respondents should not state they can achieve the Limit/s of Reporting and later be found to be unable to do so as this might result in the termination of an agreement that might be entered into.
- For certain chemicals/chemical classes a prescriptive list of analytes is provided. These are required for historical comparison purposes. Respondents may submit a response for these chemicals/chemical classes if they are unable to analyse for the analytes prescribed, but might not be successful.
- For chemicals/chemical classes where no prescriptive list of analytes is provided, scoring will consider the number of analytes relative to the respondent with the largest number of analytes, in addition to other scoring criteria.

**Quality assurance and quality control:**

- Considerable emphasis will be placed on quality assurance and control for identifying successful respondents. Respondents must thus provide information on quality assurance and quality control procedures.
- This should include, but not necessarily be limited to the type and number of Certified Reference Materials/Standard Reference Materials, laboratory and method blanks, matrix spikes, and sample duplicates analysed per batch of samples, and sample batch size.
- Note that respondents must include the results of quality assurance and quality control analyses along with sample results. Stating that these procedures are followed but not reporting on them might result in the termination of an agreement that might be signed.

**Turnaround time:**

- The expected turnaround time for sample analysis should be provided.

**Deliverables:**

- The results of analyses should be provided as a laboratory certificate and ideally also an Excel spreadsheet and should include all quality assurance and quality control results. Respondents may elaborate on reporting should they consider this necessary.

**Price:**

- The price/s provided should be for the 2025 financial year.
- In the event a respondent is based outside of South Africa, prices can be provided in the local currency. The exchange rate at time of submission must be included and used to convert to South African currency (ZAR).

**Permits:**

- International respondents must be in possession of a valid permit for the import of water, sediment and/or biological tissue and must provide proof of such permit/s.

**Other information:**

- Respondents may include any other information they consider might assist the adjudication committee in identifying suitable and/or preferred suppliers. This could, for example, include the results of inter-calibration exercises, demonstrable experience in the analyses, etc. In the case of demonstrable experience, respondents do not have to provide reports and so on (but may do so), but can provide an internet link to reports, scientific publications, and so on where the respondent laboratory was used to demonstrate such experience.
